- Team Oriented
- Critical thinking
- Collaboration
- Creativity
- Technical Writing

EDUCATION

January 2020 - Associates in Computer Information Technology A.S, Middletown, CT,
January 2023 Middlesex *Community College*

ABOUT ME

Hi, I'm Elizabeth. I'm a recent graduate student at Middlesex Community College with an Associate of Science in Information Technology with a programming track in JavaScript, Java, and HTML & CSS. I originally wanted to join Cybersecurity, but after taking this relevant course, Web Design, I found my passion is to become a Front End and, eventually, Full Stack Developer. So, I study deeper into this, and it turns out that I enjoy building responsive websites and learning to program and create video games and applications. Please check out my website to see the latest projects I'm developing. I interned at my school's technology center (Middlesex Community College), and using my creativity, I helped create brochures and posters using Adobe Photoshop and transferred to intern at the Meriden City Hall IT department, where I worked with the team to help with projects and helping adjusting settings with suggestions.

HOBBIES

Baking, Reading, Studying, Painting, Coding
